“

WE GROW THE PLANT OF LIFE

”

THE PLATFORM TO DISRUPT THE BIOPHARMACEUTICAL INDUSTRY.

Thailand's Biotech startup using *"plant-based technology platform"* to produce recombinant protein which can be use as cosmetics, medical devices, biological drugs and vaccines.

- The platform has the flexibility to produce biopharmaceutical products of interest within weeks rather than months or years.

Suthira Taychakhoonavudh; Waranyoo Phoolcharoen;

Co-founders

Started in 2018 with currently 4 products ; cosmetics and medical devices already go to market and more than 15 products in the prototype stage

OUR R&D PIPELINE

● Human Vaccines and Drugs

- Pembolizumab
- Nivolumab
- Atezolizumab
- anti CTLA4
- Hand foot mouth disease
- Rabies
- Nipah
- Ebola
- Osteopontin
- COVID-19 Vaccine
- RSV Vaccine

● Medical Devices

- Hand Foot Mouth Disease mAb
- Spike protein of SARs-CoV-2
- PRRSV Diagnostic test kit

● Lab Reagents

- Epidermal Growth Factor (EGF)
- basic Fibroblast Growth Factor (bFGF)

● Animal Vaccines and Drugs

- PEDV Subunit Vaccine
- PEDV Subunit Vaccine
- Lumpy skin

- basic Fibroblast Growth Factor (bFGF)
- Epidermal Growth Factor (EGF)

● Cosmetics Raw Materials

Protein Production Service

As fast as 2 weeks
Rather than months or years
